What is poetry? A simple but apparently impossible question to answer. A poem is immediately recognisable, be it a ballad from the late middle ages, an Elizabethan sonnet, an epic by Milton or Tennyson, or the free-verse lyric of today. But what is it that links these works? What were writers as different as Donne, Pope, Shelley, Whitman and Eliot doing that makes it possible for us to see their work as belonging to the great artistic structure we call poetry? Does something happen in a poem that does not happen in a novel, an essay or a play, and if so what is it?

In this survey of the course of English poetry over more than six centuries we have tried to answer these questions by examining what poetry has been. Here, the great ages of poetry – Elizabethan, Augustan, Romantic, Victorian and Modernist – are evoked in turn, while the novelty and impact of American poetry is also considered.

What emerges is a series of love affairs with language. Poetry is distinguished by language itself in the foreground – language is made to live and flow in what can only be called the music of ideas. The line of verse and the stanza, isolated on the page, draw the eye and the mind to each word and phrase, which should be individually striking, but which must harmonise into a satisfying whole. Prose is subtler – more flexible, more diffuse and more forgiving. Two or three imperfect words can diminish or even ruin a poem; a thousand will not ruin a novel. In prose we are looking through the language at the ideas; in poetry we are looking at, and perhaps even living within, the language itself. That is the difference. The music of ideas is not wholly rational, and as we encounter it in poetry it gives a depth of pleasure that prose rarely can. It embodies an imaginative response to the world, an alchemy of words in which experience is
recreated in new forms; this is, after all, exactly what we mean by the very word ‘poetic’.

What have poets used this music for – what have they had to say? In many cases, of course, the answer is: little that was original. They have often been content to repeat and polish themes and styles which they have learned from others: the tradition of poetry is built up as one voice releases other voices. But this is a characteristic of any art and it does not mean that this kind of work is worthless. The sonnet-writers of Elizabethan England, or the satirical poets of the Augustan age, wanted to show their mastery of certain models, often classical or foreign models. Originality and individuality were not part of their conception of poetry. A lyric such as Carew’s –

Ask me no more where Love bestows,
When June is past, the fading rose…

– might have been written by any one of a score of poets at any time between 1600 and 1700, but its charm and balance are as enduring as the melody of a song.

There have always been poets who did value individuality above all things, who wanted to explore new realms of thought and feeling. Donne, Herbert and the other metaphysical poets rejected stock poeticalisms in their attempts to bring real experience, emotional and spiritual, into their poems.

The story of English poetry could be seen in terms of a tension between formal mastery and individual expression, a tension in which the Romantic Movement was crucial in focusing attention on the personal vision of the poet. Blake, Wordsworth, Shelley, Keats, Tennyson and Whitman were exploring their own selfhood and their response to the world; they were no longer interested in perfecting existing models, or in being part of any school. Others, such as Hopkins and Emily Dickinson, were so radical in their approach that they remained unpublishable in their lifetimes. In the modern era we have come to be interested in poets only when they differ from others, only at the point where they acquire a unique voice. Perhaps it is no accident that this has happened at a time
when the conventional poetic forms have
dissolved and all but vanished: we now
find ourselves in a rich but bewildering
modern landscape of poetic freedom, for
which we have few maps.

Poetry was for centuries a mainstream
art, and writers such as Spenser, Milton,
Donne, Blake, Wordsworth, Tennyson
and Browning created a world of beauty,
of images and forms, as enduring as the
painting of the Renaissance or the music
of the classical age. Their work became
part of the English consciousness. Poetry
may no longer enjoy this position of
centrality in our culture, but the music of
ideas that these poets developed is still
among the most precious legacies that we
have received from the past. This history
explores that legacy and shows how vital
and challenging modern poetry can still
be. Lucidly presented and richly illustrated
with passages from scores of great poets,
it offers an expert guide to the whole
world of English and American poetry
that is distinctive, thought-provoking, and
above all, enjoyable.
